ENCAMPMENT OF MILITIAMEN

A Uniform System of Accounting to be Inaugurated by Idaho County Auditors.

Special Correspondence.

BOISE, Ida., Oct. 31.—Although there is not the slightest change in the banking business of Boise city, due to the disturbed financial condition throughout the country, yet the local bankers are enacting earnest precautionary measures toward avoiding trouble or relieving distress if it does happen to come.

The first three days of the week the bankers of the city met to consider the proposition of organizing a clearing house association, and yesterday succeeded in bringing to pass a complete organization, which is to be known as the Boise Clearing House Association. E. B. Coffin was elected president; L. A. Coate, secretary, and W. L. Bear, manager. It is the intention of the association to make a clearing each week from now on. The association reports that there is absolutely no need for alarm in regard to local money matters. The banks all have plenty of money and they now have affairs so well in hand that they can meet most any emergency.

ON INSPECTION TRIP.

Twenty-three officials of the different divisions of the Oregon Short Line Railroad company arrived in this city at 2:30 yesterday evening, on their annual trip of inspection. The roads of the company are being inspected in every detail. The party visited the Natomastown as soon as it arrived, where all the members took a plunge, then, after supper, went to the Orpheum theater. Their train pulled out of Boise at 11 o'clock last night for Shoshone. An inspection of the Woodriver branch will be made today.

FLOW OF HOT WATER.

Harbert and Perkins, who have been drilling for an artesian flow of hot water, on a small tract of land back of the Sanitarium, were rewarded Tuesday morning by striking a subterranean current which carried a temperature of 145 degrees. The pipe has been driven a depth of but little less than 1,000 feet when the flow was reached. The flow is regular, though the pipe is small. Another well, much larger, will be driven right away in an effort to materially increase the present flow.

SUPERVISOR FOR IRRIGATION.

The recent action of the state land board in relation of the construction of irrigation works, will be reviewed as a step toward material improvement and good government. Hereafter, the construction of irrigation works, principally under the Carey act, was merely examined when completed by the state engineer and a report given

as the substantiation of the work; but now the board has appointed a man to the special work of supervising the construction work from start to finish and to keep a strict record of the progress and nature of the work. The settlers will thus be protected against any injustice on the part of the construction companies. The man appointed to this place is Charles W. Spearman, of the state engineer's office.

WORK CEASES ON YELLOWSTONE LINE.

CONTRACTOR W. O. CREER, who has had the contract for the construction of the Park line, came up yesterday morning from Salt Lake, and went up the branch to inspect the work, as the road was declared completed yesterday, or the work so far as his contract is concerned. Although he has built 70 miles of road, and two years in the past week he has been in the work, it having been started in October, 1905. The road is completed 55 miles beyond Marysville, and it is now possible to go to the line of Yellowstone park by road.

During the past two weeks men have been laid off in gangs of from 50 to 200, and were paid off at Ashton, and twice in the past week the Ashton bank was compelled to send out for enough currency to pay the little checks. And during this time the time taken up the river has had a howling old time, as there is every nationality under the sun in that grading gang, and it is a study in the composite to watch the characters. The saloons, stores and restaurants have all been doing a land office business, and there has likewise been an opportunity to speculate, and a good many of the laborers indulged.

Mr. Creer has in the past two years given a good many sub-contractors some of which were thrown up and others completed. The lava rock on a portion of the road was a stumbling block of experience to several contractors, but none of this rock was encountered beyond Pogo's mill. The work has progressed with rapidity this summer, and there were 2,000 men or more constantly employed. About \$50 will be retained for some time yet to straighten up the track and to do away with the "shoo fly" or temporary tracks, keep up the grade and look after other work. What somewhat rough after getting up the grade from Marysville it is with a splendid road and in the course of two years will be one of the best mountain roads in the country. Some great fires were made on the route and the roadbed is very solid.

While the train service at this time is necessarily very bad, only a work

KILLED A BIG BEAR WITH CHARGE OF BIRD SHOT.

THE nimrod have been busy the past week and Br'er Bear has had as many troubles in this section as in the haunts of the redoubtable Teddy, says the Northern Idaho News.

Young Will Elison of Kootenai started things Saturday by killing a large black bear on Kootenai hill. The lad was out hunting birds and only had a shotgun with him loaded with fine birdshot. He was sitting down resting, when he spied the bear coming down the hill directly at him and aimed to pull both triggers and give the bear a double load of bird shot in the head, but only one barrel went off and the bear kept on coming. He broke the gun, ejected the two shells and put in two more and gave the bear three more loads in the head, and still Brother Bruin came on. The young lad stood his ground pluckily until he had put seven loads of fine bird shot into the bear's head, the last two loads being at close range, not over 20 feet and they literally blew the bear's head off. The bear was brought to this city and sold to the People's meat market, who have been serving bear meat to their customers, and the skin will be mounted.
